

# RubTile - interlocking industrial mats

interlockable tiles / nitrile rubber / anti-fatigue / drainage

Nitrile rubber - oil resistant

Solid or with holes

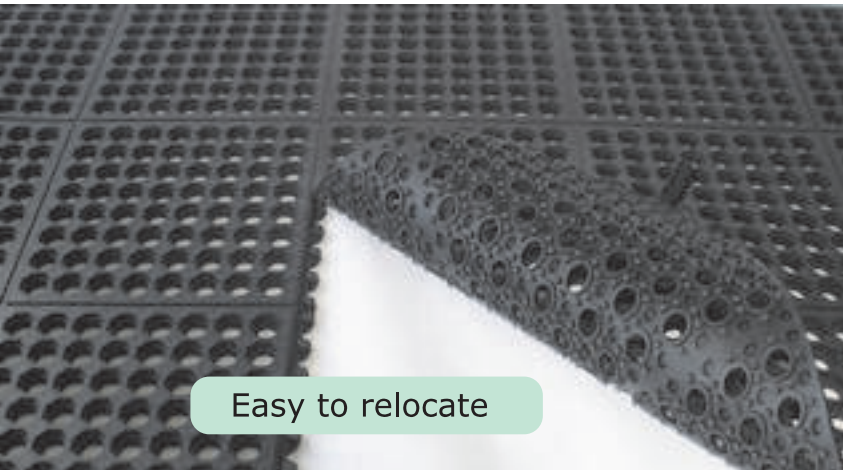

Interlocking 91x91 cm tiles

Yellow or black bevels - easy access

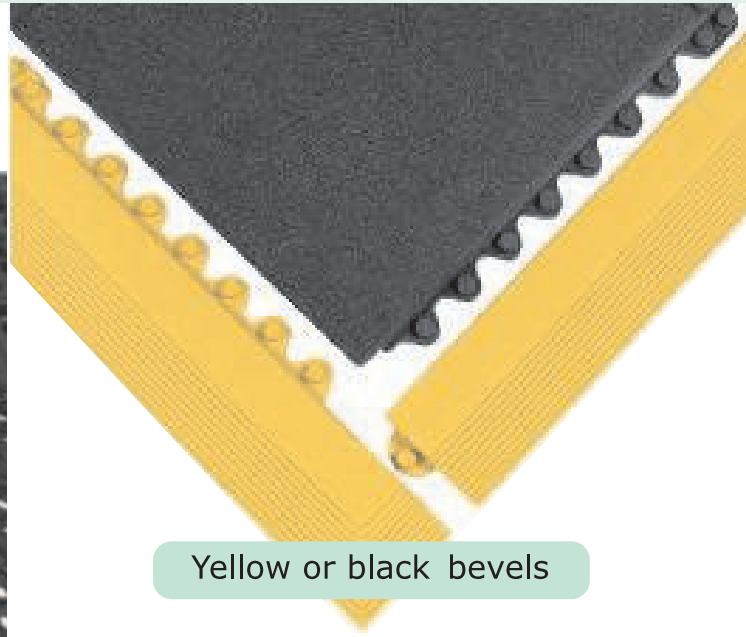

# RubTile - the industrial workplace mat

The flexible interlockable solution for on-site installation...

Interlocking 91x91 cm tiles

Easy to relocate

Yellow or black bevels

RubTile is the solid and flexible workplace mat solution. Made of high-grade nitrile rubber, recommended for polluted industrial areas with oil, chemical, water spilling.

An extremely heavy, strong, solid and oil resistant nitrile rubber mat.

Made of a 100% nitrile rubber compound. Flexible installation for a smaller area or a wall-to-wall solution. RubTile Solid for workpositions with movements and areas with work traffic, carts etc.

RubTile Holes for work environments where drainage of oils, chemicals and fluids is needed. Holes are also optimum to collect metal swarfs and debris in polluted areas. Attachable with 6 cm wide bevels for easy access for material carts etc. RubTile has a positive anti-fatigue effect on employees with standing and moving workpositions. For all employees with standing workpositions in industrial areas with cold, slippery, oily, wet and polluted floors. Resistant to most industrial oils, fluids, welding sparks etc.

#### Features:

Interlocking rubber tiles with yellow or black bevels.

On-site installation/customization.

RubTile Solid for all industrial areas where a closed surface is optimum.

RubTile Holes for areas with spilling of fluids and where drainage is needed. Oil resistant. 100% nitrile rubber compound.

Attachable - black or yellow bevels.

Good standing comfort.

Durable, solid and strong.
